
ADVANCED WOUND CARE MANAGEMENT

Innovative foams for acute and
chronic wounds

POREX® Wound Care Foams

The ideal wound care solution

Our high performance foams provide a host of advantages for patient healing and comfort. The semi-occlusive foam matrix protects wounds and allows them to breathe, all while promoting moisture therapy. Our diverse line of foams features wide-ranging physical properties and options for enhancement with additives, adhesives and coatings.

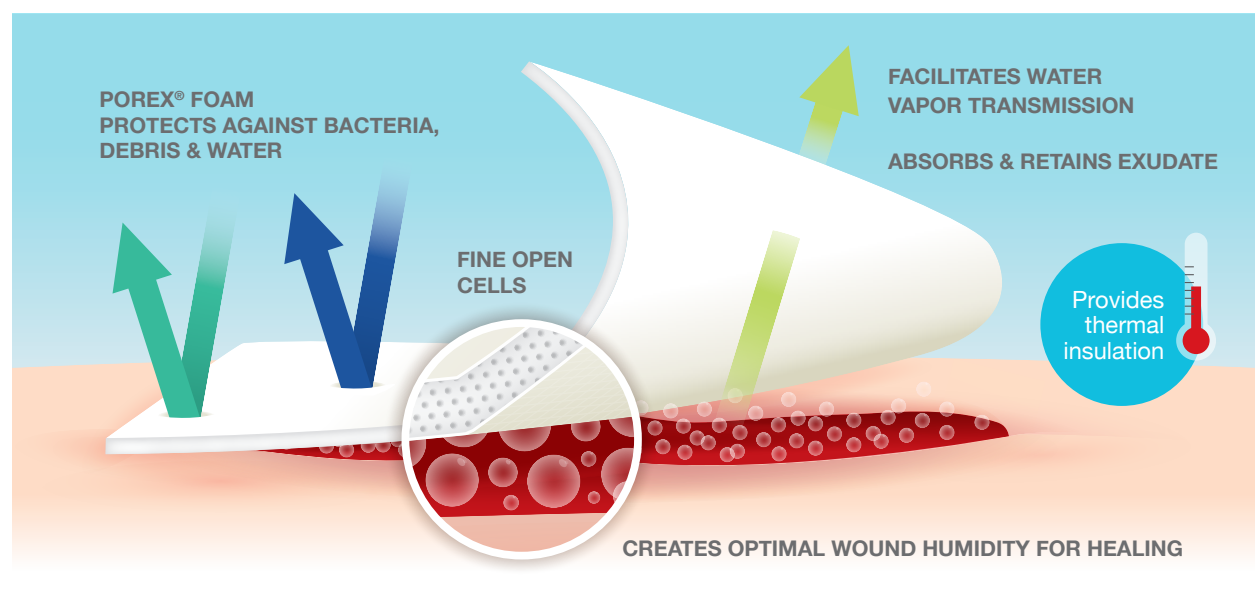

Perfect for a Full Spectrum of Wounds

- Partial to full thickness wounds with moderate to severe drainage
- Ulcers, lacerations, incisions, donor sites, peristomal wounds, and infected wounds
- Primary dressings, secondary dressings, and patient support

Options for Any Wound Care Application

- Wide-ranging sizes, thicknesses, and absorptive capacities
- Non-adherent and highly conformable to body contours
- Capabilities for active ingredients, additives, laminates and more

POREX FOAM: THE IDEAL WOUND CARE DRESSING

Featured POREX® Wound Care Foams

Enhanced wound care for patients—
higher value for OEMs

MEDISPONGE® 50PW

Standard performance

- Strong wound exudate management
- Absorbs up to 18x product weight
- Poured to thickness with a soft skin surface

MEDISPONGE® SUPERSOFT™ 60P

Advanced performance for better healing

- Absorbs up to 18x product weight
- Fine cells for minimized adhesion
- Highly conformable to body contours

MEDISPONGE® SUPERSOFT™ 64P

SuperSoft™ patient comfort with strength for high-speed conversion

- Absorbs up to 15x product weight
- Extremely fine cells for enhanced tissue granulation
- Matte side with a velvety soft touch
- Glossy side for increased bond strength to laminates
- Poured to thickness—as thin as 1.25 mm
- Requires carrier liner

MEDISPONGE® 30W

Versatile product variations and performance

- Absorbs up to 15x product weight
- Higher elongation for enhanced adaption to body contours
- Skived to thickness for wider, thicker rolls
- Open surface enhances active ingredients, composites, laminates and more

Featured POREX® Specialty Medical Foams

Solving specialized challenges for patients and brand owners

Nanosilver Antimicrobial Foam

The broad-spectrum antimicrobial properties of silver can help manage healthcare associated infections.

NANOSILVER-INCORPORATED HYDROPHILIC POLYURETHANE FOAM

Superior protection and patient comfort

- Uniform distribution of active ingredients in foam
- Consistent, sustained release
- Higher long-term efficacy with less silver
- >99.99% efficacy for Gram-positive and Gram-negative bacteria and fungal species
- Non-adherent, fast wicking and highly absorbent

SILVER'S ANTIMICROBIAL ACTION

Scar Management Foams

POREX®'s wound care management expertise provides the perfect foundation for scar healing and minimization. Our foams combine the tensile strength for pressure therapy with the ideal moisture and oxygen levels for healing.

HSS X-7™ FOAM

The perfect moisture and pressure levels for scar reduction

- Lower porosity for higher moisture levels
- 350% elongation makes application for pressure therapy easier
- Lower density makes for more comfortable, less obtrusive daily wear

POREX: The Ideal Foam Supplier

Independent Wound Care Foam Producer

POREX® is not only one of the very few independent medical foam manufacturers with a global footprint, we are the largest. We can develop new foams and white label for nearly any brand owner around the world.

Custom Formulations & Toll Capability

Unlike nearly all of our competitors, we produce our own prepolymers, the base materials for medical foam. POREX® can also incorporate additives and active ingredients for customers while ensuring complete quality control.

ISO-Certified Medical Device Manufacturing

All of our foams are produced in an ISO compliant medical device facility for the utmost purity and reliability.

POREX: The Trusted Partner of Global Brand Owners

Our global sales channel infrastructure enables customers across North America, South America, EMEA (Europe, Africa and the Middle East), Asia and Australia to bring their products to market with the utmost efficiency and dependability.

Full Converting & Capabilities

Reducing lead times and production costs while enhancing value

SKIVING

POREX® Medical Grade Foam Development Quality Assured from Start to Finish

Porex offers more than products that improve patients' health and wellness. Our Quality Assurance Standards make the FDA and international regulatory approval process easier and more efficient for customers.

ISO Certified Medical Device Manufacturing

Builds compliance with the FDA and worldwide regulatory bodies

Customer Assistance with Regulatory Medical Device Review

Documentation to streamline the regulatory process

Manufacturing Process Validation

Proves product consistency according to FDA and ISO standards

Engineering Service Agreements

Clarifies the production process for customer confidence
